## CYLINDER MANAGEMENT SYSTEM

Keep empties from mixing in with the fulls. A quick viewing of your facility and you can find, by the imprint and color of the tag, the status of your gas supply.

Color-coded "FULL / EMPTY" rings can identify a cylinder's content status. One side of the ring is labeled "EMPTY" in red, the other side is labeled "FULL" in green. Put the "FULL" side on the cylinders when they first come into your shop. After you've used the cylinder, drop the "EMPTY" side of the ring over the cylinder cap. This will indicate cylinder is ready to go back to your gas supplier for refill.

See page **8B-7** for
