REGULATORY STANDARDS

OSHA regulatory standards that have requirements for first aid:

- 29 CFR 1910.151 General Industry
- 29 CFR 1926.50 Construction Operations
- 29 CFR 1915.98 Shipyard
- 29 CFR 1910.266 Logging Operations
- 29 CFR 1917.26 Marine Operations
- 29 CFR 1910.269 Electric Power Generation, Transmission & Distribution

<http://www.osha.gov/> - Look under *Laws and Regulations then Standards* for a full directory of OSHA Standards.

ANSI Standards:

- Z308.1- 2003 American National Standard - minimum requirements for workplace first aid kits
- Z358.1 – 2004 American National Standard for emergency eyewash and shower equipment

Available from ISEA, 1902 Moore street, Suite 808, Arlington, VA 22209.

OSHA 29 CFR 1910.151 Medical Services and First Aid - General Industry

The standard serves general industry and requires first aid supplies to be readily available. OSHA states in Appendix A that the contents of kits listed in ANSI Z308.1-2003 should be adequate for small worksites. OSHA also recommends that employers determine the need for additional kits and supplies for larger worksites or when multiple operations are conducted at the same worksite.

Standard Requirement	Easy Guidelines to Follow
1910.151(a) - The employer shall ensure the ready availability of medical personnel for advice and consultation on matters of plant health.	Employers must seek advice from medical professionals such as, the local emergency room, fire/rescue or physician to ensure that their first aid program is adequate.
1910.151(b) - In the absence of an infirmary, clinic, or hospital in near proximity to the workplace which is used for the treatment of all injured employees, a person or persons shall be adequately trained to render first aid. Adequate first aid supplies shall be readily available.	First aid supplies should be located in an easily accessible area. Use the 3-4 minute rule to get first aid supplies to the scene. The employer also needs to assess the particular needs of the workplace and tailor first aid kits and their placement to the particular needs of the workplace. Advice as stated above may be helpful.
1910.151(c) - Where the eyes or body of any person may be exposed to injurious corrosive materials, suitable facilities for quick drenching or flushing of the eyes and body shall be provided within the work area for immediate emergency use.	It is the employer's responsibility to assess the particular conditions to determine the suitable eyewash station required and that it provides suitable protection against caustic chemicals to which the employees may be exposed.

REGULATORY STANDARDS

OSHA 29 CFR 1926.50 continued...

Standard Requirement	Easy Guidelines to Follow
1926.50(e) - Proper equipment for prompt transportation of the injured person to a physician or hospital, or a communication system for contacting necessary ambulance service, shall be provided.	Transportation equipment for injured employees must be made available or a communication system needs to be established to contact rescue or ambulance if required.
1926.50(f) - In areas where 911 is not available, the telephone numbers of the physicians, hospitals, or ambulances shall be conspicuously posted.	Post telephone numbers for local emergency personnel in an accessible place. Make sure all employees know where the numbers are posted.
1926.50(g) - Where the eyes or body of any person may be exposed to injurious corrosive materials, suitable facilities for quick drenching or flushing of the eyes and body shall be provided within the work area for immediate emergency use.	Emergency eyewash/body flush facilities must be made readily available when corrosive materials may come in contact with any employee.

ANSI Z308.1-2003 - American National Standard - Minimum Requirements for Workplace First Aid Kits

This standard establishes the minimum performance requirements for first aid kits and their contents. OSHA 1910.151 Appendix A states the following: "The contents of the kit listed in the ANSI standard should be adequate for small worksites. When larger operations or multiple operations are being conducted at the same location, employers should determine the need for additional first aid kits at the worksite, additional types of first aid equipment and supplies and additional quantities and types of supplies and equipment in the first aid kits."

Below are the minimum fill requirements for an ANSI compliant first-aid kit:

Item (minimum size or volume)	Qty Required
Absorbent compress, 32 sq. in. with no side smaller than 4 in.	1
Adhesive bandages, 1" x 3"	16
Adhesive tape, 3/8" x 5 yd. length	1
Antiseptic, 0.14 fl. oz (.5 g) application	10
Burn treatment, 1/32 oz (.9 g) application	6
Medical examination gloves	2 pair
Sterile pad, 3" x 3"	4
Triangular bandage, 40" x 40" x 56"	1

UNITIZED FIRST AID KITS

UNITIZED FIRST AID KITS

These sturdy and durable kits are waterproof and equipped with carrying handles and mounting brackets for versatile mounting throughout the facility. Kits are ANSI Z308.1-2003 compliant. Color coded cartons hold individual sealed unit dose applications. Color codes are as follows: yellow for bandages and compresses, orange for personal protection, blue for antiseptics and wound cleaners, red for burn treatment, green for special and miscellaneous items.

FIRST AID STATIONS

FIRST AID STATIONS

These first aid stations provide the largest quantity and assortment of first aid and medical supplies for most minor injuries, aches and pains. Ideal for large office or manufacturing settings, they offer a large supply of medicinals for relief from cold, pain and indigestion. Tablet medicinals are non-drowsy and are packaged in tamper resistant single dose units. All stations contain CPR barriers and trauma dressings. All first aid stations are ANSI Z308.1-2003 compliant.

EMERGENCY EYE AND SKIN FLUSH STATIONS

FA-127042

FA-129034

Successful treatment of acid and alkali burns is contingent upon the quickest possible response. These new Emergency Eye & Skin Flush Stations were designed for just that purpose. The new eyewash stations are more functional, user-friendly and eye catching! It's just another example of how this product innovation helps to solve your problems more effectively.

Features	Benefits
• Highly visible yellow back plate	• Easy to find in an emergency where fast response is critical
• Unique positive shock cord retention system	• Ensures both quick release and retention under adverse conditions
• Universal station back plate	• Provides flexibility depending on need as it accommodates both 16 and 32 oz. bottles
• Low profile	• Less likely to be accidentally bumped or hit
• Compact size	• Small size takes up less wall space

Part #	Description	Order Multiple	Case Pack Qty.
Convenience Packs (stations with bottles)
